IO

light

Feel the advantage of carbon composite up to the palm of your hand: IO is stable, sensitive and very light.

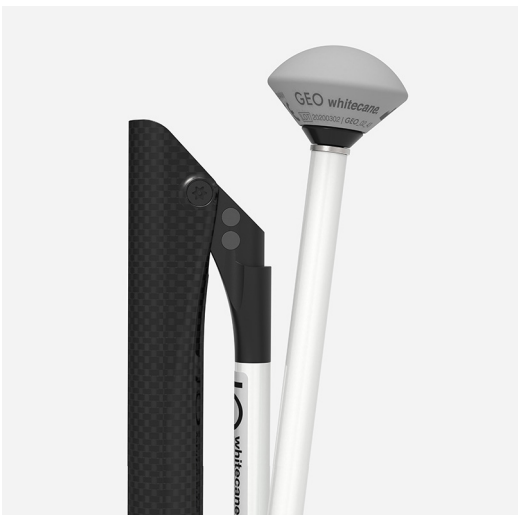

ergonomic

The curved handle follows the natural posture of the hand and allows for a variety of grip positions.

three-part

IO can be unfolded and folded in a quiet and controlled manner, even in confined spaces. Two magnets hold IO together when folded.

visible

IO combines a reflective film for night visibility with a fluorescent yellow film for daytime visibility and twilight.

intelligent

The patented IO joint yields reversibly in the event of obstacles, thus protecting against damage.

GEO

GEO is the light-weight rolling tip for IO. With its standard thread, it is easily mounted and quick to exchange thanks to the plug-in principle. GEO is available in two versions.

IO is a white cane for the visually impaired. Exceptionally lightweight, its clever ergonomics and intelligent functionality deliver visibility, orientation and mobility. Available for left- and right-handers, IO comes in the established standard lengths (cm): 107, 112, 117, 122, 127, 132, 137, 142, 147, 152, 157.

IO is certified according to the European Medical Device Directive (EU)2017/745. IO is patented and has won international design awards. Made in Germany.

about whitecane.

whitecane. designs and develops high quality medical products for people with visual impairments that are technically advanced and certified according to European guidelines.

»Our aim is to improve the mobility of people with visual impairments.«
